

# Effective communication- VitaFit

Lakshit Jain | Cohort 28

## About VitaFit

VitaFit app is a user-friendly mobile application designed to help users stay healthy through workout tracking, nutrition planning and lifestyle improvement features. It's an all-in-one personal fitness companion.

## Problem Overview

VitaFit is experiencing declining repeat usage and retention due to

- reduced user motivation
- lack of personal connection with instructors

Users engage inconsistently as the platform lacks social accountability and gamified incentives that encourage long-term fitness habits.

## Part 1 - Write a Product Requirements Document (PRD)

### Title – “Vita Engage + initiative”

#### 1.Description: What is it?

The Vita Engage + initiative is a feature set designed to improve user motivation, engagement, and repeat usage on the VitaFit platform.

Two core features being proposed

#### ➤ **Gamification & Rewards System**

It is a motivation-driven feature designed to make workouts more engaging and habit-forming by integrating game mechanics into the fitness experience.

- Points (Vita Points)
- Streaks
- Badges
- Levels
- Redeemable rewards

This creates habit loops and incentivizes workout consistency.

## ➤ **Community Challenges**

A social fitness layer where users participate in:

- Group workout challenges
- Squad competitions
- Leaderboards
- Collective fitness goals

This builds accountability and peer motivation while strengthening the instructor-user ecosystem.

## **2. Problem – What problem is this solving?**

VitaFit is facing a decline in repeat usage and retention due to:

- Drop in user motivation over time
- Lack of accountability mechanisms
- One-way workout experience
- Weak emotional connection with instructors
- No social or competitive engagement

## **3. Why – How do we know this is a real problem?**

This problem is supported by both product data and user feedback.

### **Quantitative Signals**

- Decline in weekly active users (WAU)
- Reduced session completion rates
- Drop in 30-day retention
- Low repeat session frequency per user

### **Qualitative Signals**

- User feedback citing “loss of motivation”
- Churn surveys mentioning “boring solo workouts”

- Reviews requesting group workouts & challenges
- Low instructors follow/interaction rates

#### **4. Success – How do we know if we’ve solved it?**

We will track success using engagement, retention, and behavioural metrics.

##### **Primary Metrics**

- Increase in Weekly Active Users (WAU)
- Repeat workout sessions per user
- 7-day & 30-day retention rate
- Challenge participation rate

##### **Secondary Metrics**

- Average workouts per week
- Streak continuation %
- Reward redemption rate
- Instructor session re-booking %

#### **5. Audience – Who are we building for?**

##### **Primary Target Segment** (Gen Z & Young Millennials (18–35 yrs))

- Fitness beginners/intermediate
- Motivation-driven users
- Social & competitive mindset
- Mobile-first behaviour

##### **Secondary Segment** (Working Professionals)

- Sedentary lifestyle
- Need accountability
- Prefer flexible home workouts

- Motivated by rewards & progress tracking

## **6. What – Roughly, what does this look like in the product?**

The features will integrate into VitaFit's core experience across the app.

### **Gamification & Rewards System (Product View)**

Appears as:

- Streak counter on home screen
- XP bar & level progression
- Post-workout reward popups
- Badge showcase on profile
- Rewards store (redeem points)

Example triggers:

- Completing a workout → Earn points
- 7-day streak → Unlock badge
- Monthly consistency → Bonus rewards

### **Community Challenges (Product View)**

Accessible via a new **“Challenges” tab**.

Users can:

- Join public challenges
- Create private squad challenges
- Compete on leaderboards
- Track group progress
- Interact via chat/reactions

Challenge types:

- 14-Day Yoga Streak
- 10K Steps Squad Goal

- Zumba Burn League

## **7. How – What is the experiment plan?**

We'll validate impact through a phased rollout & MVP testing strategy.

### **Phase 1 — MVP Build**

Launch with:

- Basic points system
- Simple streak tracker
- Limited challenges
- Leaderboard prototype

Audience: 10–15% user base

### **Phase 2 — Beta Expansion**

Enhancements:

- Badges & levels
- Squad challenges
- Instructor-led competitions
- Reward redemption

Audience: 40% users

### **Phase 3 — Full Rollout**

Add:

- Advanced rewards marketplace
- Seasonal events
- Brand partnerships
- Social sharing

Audience: 100% users

## **8. When – When does it ship and what are the milestones?**

Estimated product development roadmap:

### **Month 1 — Discovery & Planning**

- User research
- Competitive benchmarking
- Feature scoping
- PRD finalization

### **Month 2 — Design**

- Wireframes
- UX flows
- Gamification logic design
- Leaderboard architecture

### **Month 3 — Development (MVP)**

- Points engine
- Streak tracker
- Challenge module

### **Month 4 — Beta Launch**

- Controlled user rollout
- Feedback collection
- Bug fixes

### **Month 5 — Full Release**

- Rewards store
- Advanced badges
- Squad competitions

## Part 2- Visualize Core Flows

### 1.Gamification Core Flow Explanation

The user begins from the Home Dashboard where streaks and XP progress are visible. This creates a motivation trigger before starting the workout.

After completing a workout, the user earns VitaPoints and sees XP progress animation, reinforcing instant gratification.

If milestones are achieved, badges are unlocked, strengthening emotional engagement and achievement pride.

Finally, the Rewards Store encourages repeat workouts by showing locked rewards that require additional sessions to unlock, creating a strong retention loop.

| Step             | Engagement Boost  | Retention Trigger    |
|------------------|-------------------|----------------------|
| Workout Complete | Reward animation  | Streak visibility    |
| XP Progress      | Level progression | Near-next-level push |
| Badge Unlock     | Achievement pride | Habit reinforcement  |
| Rewards Store    | Redeemable value  | Incentivized return  |

### 2.Community Challenges Core Flow Explanation

Users access the Challenges tab where they can explore active fitness challenges and join a squad.

Upon joining, the Challenge Dashboard displays personal and squad progress, creating social accountability and competition.

When a workout is logged, leaderboard rankings update instantly, boosting engagement through recognition and competition.

At challenge completion, users receive rewards and are prompted to join the next challenge, ensuring continued participation and repeat usage.

| Step           | Engagement Boost   | Retention Trigger      |
|----------------|--------------------|------------------------|
| Join Challenge | Social belonging   | Public commitment      |
| Dashboard      | Competition        | Rank tracking          |
| Workout Logged | Squad recognition  | Team pressure          |
| Completion     | Celebration reward | Loop to next challenge |
